The internal areas of the residential properties on the upper floors will generally be slightly larger than those on the lower floors because of the reducing thickness of the structural walls on the upper floors. The internal areas of the residential properties on the upper floors will generally be slightly larger than those on the lower floors because of the reducing thickness of the structural walls on the upper floors. (This does not apply to the residential properties in the Phase because the design of the Phase does not involve reducing thickness of structural walls of residential properties on the upper floors and hence internal areas of those residential properties will not be increased.)

因住宅物業的較高樓層的結構牆的厚度遞減，較高樓層的內部面積，一般比較低樓層的內部面積稍大。（不適用於期數內的住宅物業，因為期數的設計是不牽涉較高樓層的住宅物業的結構牆的厚度遞減。因此，該等住宅物業的內部面積不會增加。）
